RITIK THAKRE

QA ENGINEER | TEST AUTOMATION | AI-ASSISTED SOFTWARE DEVELOPMENT

Nagpur, Maharashtra, India | +91 7038490070 | ritikthakre2020@gmail.com | www.linkedin.com/in/ritik-thakre2020

PROFESSIONAL SUMMARY

QA Engineer with hands-on experience across Web, Progressive Web Applications (PWA), Android, and iOS platforms, driven by independent application exploration and end-to-end workflow understanding rather than reliance on predefined test cases. Experienced in deriving comprehensive manual test scenarios (positive, negative, boundary, and alternative flows) and developing Java, Selenium WebDriver, and TestNG automation scripts grounded in real application behaviour. Possess practical experience implementing Playwright automation with Java using AI-assisted development workflows, alongside REST API and SQL validation. Leveraging deep product knowledge to expand beyond traditional QA into AI-assisted backend, PWA, and mobile application development while preventing regressions.

TECHNICAL SKILLS

Test Automation: Java, Selenium WebDriver, TestNG, Playwright with Java (AI-Assisted Workflows), Maven, Git, Assertions, Automation Scripts, Regression Automation

Manual & Cross-Platform QA: Functional Testing, Manual Testing, Exploratory Testing, UI Testing, Integration Testing, System Testing, End-to-End Testing, Smoke Testing, Regression Testing, Retesting, Negative Testing, Boundary Testing, Cross-Platform Testing, Web Application Testing, PWA Testing, Android Testing, iOS Testing

API & Database Testing: Postman, REST APIs, CRUD Validation, HTTP Status Codes, JSON Validation, SQL, Data Integrity Checks

Development Technologies: PHP, Laravel, Ionic, Java, Spring Boot, Hibernate/JPA, REST API Development

AI Coding & Development Tools: OpenAI Codex, Antigravity, Cursor, Claude

QA Practices & Workflow Tools: STLC, SDLC, Agile/Scrum, Jira, Defect Lifecycle Management, Test Scenarios, Test Cases, Requirement Traceability Matrix (RTM), Release Validation

PROFESSIONAL EXPERIENCE

SKYESTONE AI TECH PRIVATE LIMITED | Nagpur, Maharashtra

Jr. QA Engineer | 08 April 2026 – Present

- Independently explore application features, module interactions, and end-to-end user journeys to build a complete understanding of expected application behaviour prior to test execution and automation.
- Identify positive, negative, boundary, and alternative scenarios through hands-on application exploration; execute manual functional, UI, integration, system, smoke, regression, and retesting across Web, PWA, Android, and iOS applications.
- Develop and maintain automation scripts and regression suites for explored workflows using Java, Selenium WebDriver, TestNG, Maven, Git, and assertions; practical experience implementing Playwright automation with Java using AI-assisted development workflows.
- Investigate automation and functional failures, log detailed defects in Jira with reproduction steps and evidence, validate fixes, and assess regression impact to ensure changes do not break established application functionality.
- Validate REST APIs using Postman across request/response payloads, HTTP status codes, CRUD operations, and error handling; execute SQL queries for database and data-integrity verification where applicable.
- Apply accumulated application and workflow knowledge to contribute to AI-assisted software development across web and mobile, PHP/Laravel backend, Ionic PWA, and mobile application features using OpenAI Codex, Antigravity, Cursor, and Claude.
- Share daily testing and development progress with clients and coordinate across QA and development activities to support releases.

EDUCATION

B.Tech – Artificial Intelligence & Data Science | 2021 – 2024

Priyadarshini Engineering College, Nagpur | CGPA: 7.30 / 10
